## BLOOD PRESSURE MONITOR

PARR detects pulse arrhythmia, including Atrial Fibrillation (AFib), Premature Contractions (PC), Tachycardia (TACH), and Bradycardia (BRAD).

### Detects

- AFib** Atrial Fibrillation
- PC** Premature Contraction
- TACH** Tachycardia
- BRAD** Bradycardia
- ARR** Non type - specific arrhythmia

## THERMOMETER | PULSE OXIMETER

The continuous ear scanning mode views the entire ear canal and looks for the highest temperature that can be detected.

The non-contact temple forehead thermometer provides a consistent and longer distance temperature measurement.

ACT (Artery Check Technology) processes SpO<sub>2</sub> signals and determines the stiffness of the artery (Artery Condition) based on the derived wave form.

## BLOOD GLUCOSE METER | NEBULIZER

The GDH-FAD test strips can eliminate interference from oxygen variations and non-glucose sugar such as maltose and galactose.

The VAT technology allows users to adjust different levels of nebulization rate at consistent particle size.

The 3BREATH is a unique 3in1 compressor nebulizer that integrates with a nasal washer and a nasal aspirator.

# TECHNOLOGIES

Since 1988, Rossmax is committed to strive for the best technologies in each business field.

Providing value for the customer's specific need, is the key driver in inventing patented solutions. Rossmax does not compromise in fulfilling the highest quality standards and proofing the results through outstanding clinical validations.
